Licensing concept AG85LC1

by Arthur Golubev

2024-12-05

According to licensing concept ag85lc1 licensing activity has to be realized with the following entities which can have custom names and be customly grouped in groups which also can have custom names:

- licensing records – data pieces with the following structure of fields each of which is optional:

N	Group	Entity	Format of the entity
1	products	products	list of products identified of custom format
2	action acceptors	action accepting producers	list of getting doing producers identified of custom format
3	action acceptors	action accepting distributors	list of getting doing distributors identified of custom format
4	action acceptors	action accepting consumers	list of getting doing consumers identified of custom format
5	action acceptors	action accepting others	list of getting doing other participants identified of custom format
6	action pretension levels	to action accepting producers action pretension level	fixed possible set of values is: wished, claimed
7	action pretension levels	to action accepting distributors action pretension level	fixed possible set of values is: wished, claimed
8	action pretension levels	to action accepting consumers action pretension level	fixed possible set of values is: wished, claimed
9	action pretension levels	to action accepting others action pretension level	fixed possible set of values is: wished, claimed
10	actors	acting producers	list of wished of doing producers identified of custom format
11	actors	acting distributors	list of wished of doing distributors identified of custom format
12	actors	acting consumers	list of wished of doing consumers identified of custom format
13	actors	acting others	list of wished of doing other participants identified of custom format
14	actions	to action accepting producers actions	list of actions of custom format

N	Group	Entity	Format of the entity
15	actions	to action accepting distributors actions	list of actions of custom format
16	actions	to action accepting consumers actions	list of actions of custom format
17	actions	to action accepting others actions	list of actions of custom format

- licensing unit blanks – data of licensing records without any value in one or more groups;
- licensing units – data of licensing records with at least one value for each of groups action acceptors, action pretension levels, actors and actions and with value of field products;
- license – a set of licensing units;
- licensing collections – collections of custom values of fields
and claims are to be made with licenses.
